# Outline

## Introduction

Why Cashless Nigeria? Why Now?

What are the Benefits and Key Success Factors for sustainable Cashless Nigeria?

How can Academia, the IT Industry and Business be the innovation hub for Cashless Nigeria? – *Case Studies and Key Lessons Learnt*

What would the Nigerian cluster for Cashless between Academia, the IT Industry and Business look like?

Imperatives for Nigeria, the Government and the Nigeria Computer Society

Questions and Answers

There have been varied reactions since the announcement of the Central Bank of Nigeria (CBN) Retail Cash policy in April 2011 and the implementation commenced in Lagos in April 2012

- ❑ Indeed, Nigeria remains a largely cash-based economy with cash payments contributing over 80% of retail and commercial transactions
- ❑ In the short-to-medium term, the policy may have limited impact, from an infrastructure and change management readiness perspective
- ❑ Over the long term, there are real opportunities to reduce costs of cash management, change behavioural patterns of Nigeria and more importantly, create new business opportunities
- ❑ However, the responses required are not only from Government; it is a holistic response which will entail the creation and strengthening of innovation ecosystems resulting in better skilled human capital, information, infrastructure and finance
- ❑ This paper discusses the role of Academia, the Business World, the IT Industry and Government in making the Cashless economy sustainable

Introduction

## Why Cashless Nigeria? Why Now?

What are the Benefits and Key Success Factors for sustainable Cashless Nigeria?

What would the Nigerian cluster for Cashless between Academia, the IT Industry and Business look like?

Imperatives for Nigeria, the Government and the Nigeria Computer Society

Questions and Answers

There is some growth in currency in circulation across the world. However, the rate of growth is quite significant in Nigeria...

### Global Currency in Circulation

Source: Giesecke & Devrient (G & D), 2010

### Nigeria Currency in Circulation

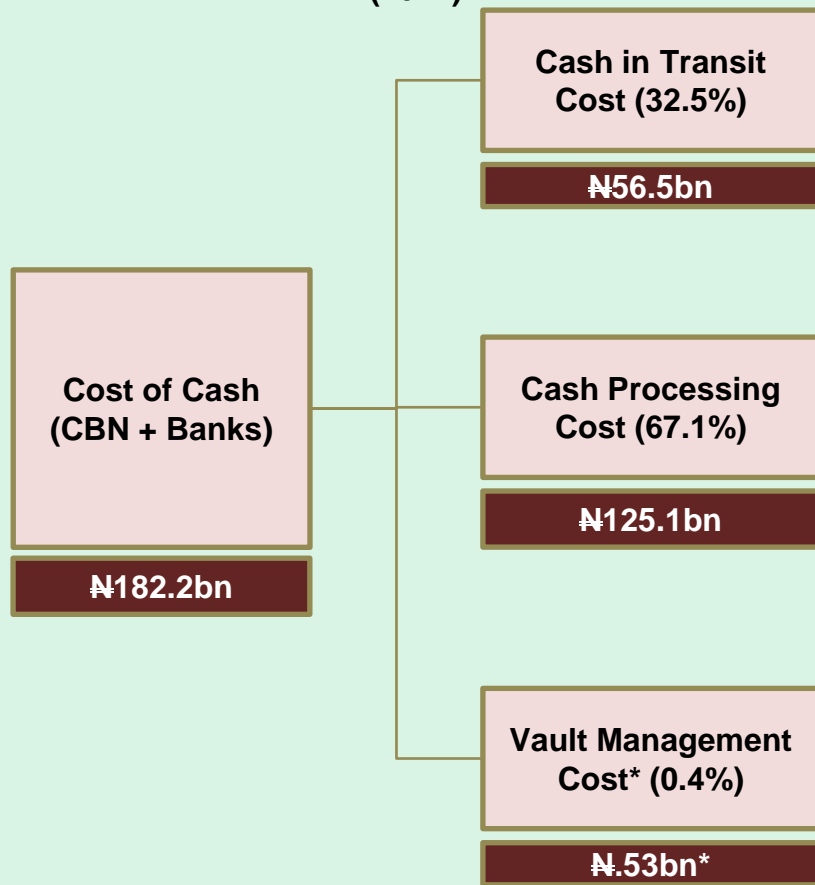

Source: Central Bank of Nigeria (CBN) Currency Operations Annual Report, 2011

\*CAGR: Compound Annual Growth Rate

...The cost of cash to Nigeria's financial system is steadily increasing and direct cost is estimated to reach ₦296bn by 2015...

**Direct cost\* of cash to Financial system (2011)**

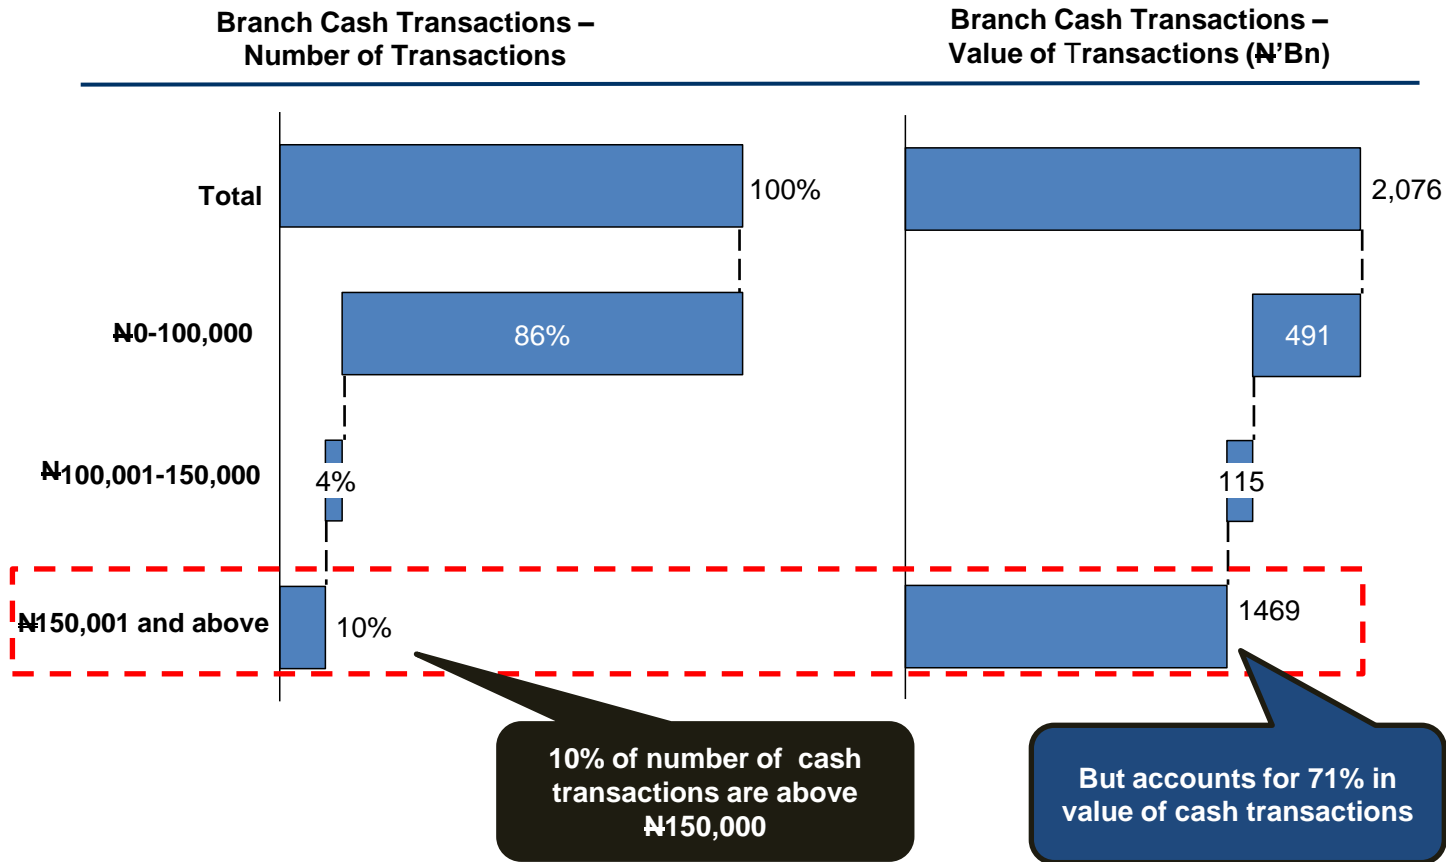

**A projection of the direct cost of cash to Financial System**

**CAGR: 10.5%**

Copyright © 2012 Accenture All rights reserved. \*Note: Bank Vault Insurance Coverage- Assumes insurance premiums of 0.1%; does not include Vault costs for CBN

...resulting in increased cost of banking services. However, the actual cost of services is not evenly borne by the banking population

*Only 10% of branch cash transactions are above ₦150,000, but they make up ~71% of the value of cash transactions.*

# The CBN's retail policy is expected to reduce operational costs, apportion costs appropriately/ reduce costs to banking customers and drive the growth of e-payments

## 1a Cash Withdrawals and Lodgements

- *Daily cumulative limit of ~~₦500,000~~ for individuals and ~~₦3,000,000~~ for corporates on free cash withdrawals and lodgements*

## 1b 3rd Party Cheque Encashment

- *3rd party cheques above ~~₦150,000~~ no longer eligible for encashment over the counter; value to be received via Clearing*

## 2 Merchant / Retailer Cash Arrangement Transition

- *Banks to cease cash in transit lodgement services to merchant-customers*
- *Merchants to engage the services of the CBN licensed cash-in-transit (CIT) companies for cash movement*

## 3 Interoperability of POS Transactions

- *No exclusive acquirer agreement or contract in Nigeria by card schemes to achieve interoperability of local currency POS transactions*

### Other supporting initiatives include:

- Cashless Lagos programme
- New POS Guidelines, Deployment model & POS Settlement Process upgrade
- Industry dedicated connectivity channel for POS traffic
- Centralised Direct Debit mandate management and introduction of Direct Debit products
- Cash Holding Model Transformation

- Licensing of Payment Terminal Service Providers (PTSP)
- POS Standardisation and Bulk procurement to accelerate rollout
- Integrated Retail Payments Transformation
- Exposure draft on Securities Settlement

Introduction

Why Cashless Nigeria? Why Now?

What are the Benefits and Key Success Factors for sustainable Cashless Nigeria?

How can Academia, the IT Industry and Business be the innovation hub for Cashless Nigeria? – Case Studies and Key Lessons Learnt

What would the Nigerian cluster for Cashless between Academia, the IT Industry and Business look like?

Imperatives for Nigeria, the Government and the Nigeria Computer Society

Questions and Answers

There are significant benefits to Nigeria in following through the retail cash policy to reduce cash in the economy

# Key success factors to making cashless sustainable include:

- Broad based consultation, i.e. multi-stakeholder and multi-industry approach to drive inclusion
- Introduction of incentives to complement the sanctions and communication initiatives
- Realistic phasing and timing of the deployment
- Disciplined Program Management, benefits realization tracking and flexibility to change course to respond to implementation issues
- Infrastructure requirements planning and deliberate build-out
- Communication and Change Management – targeted information dissemination to drive consumer awareness and education
- Appropriate dispute resolution mechanism and financial ‘ombudsman’ to manage case exceptions
- Integration between government and private sector initiatives

Introduction

Why Cashless Nigeria? Why Now?

What are the Benefits and Key Success Factors for sustainable Cashless Nigeria?

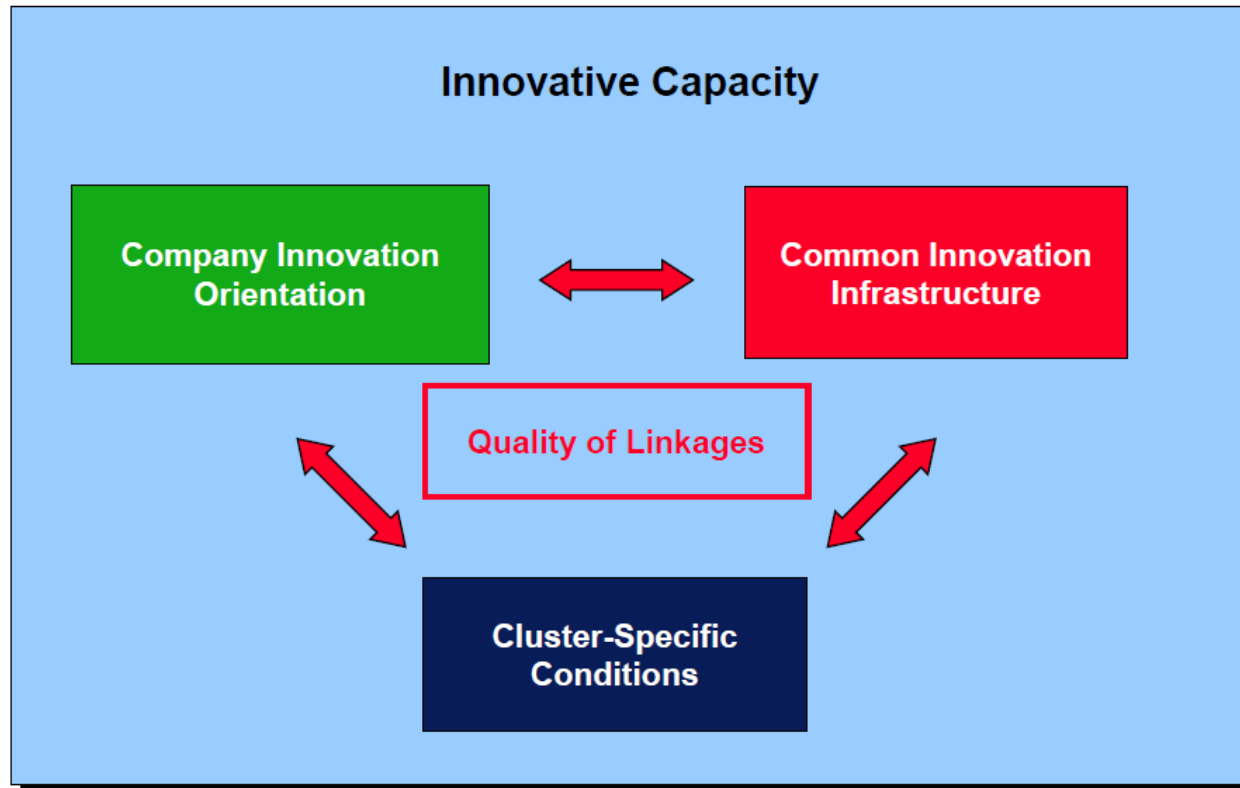

**How can Academia, the IT Industry and Business be the innovation hub for Cashless Nigeria? – Case Studies and Key Lessons Learnt**

What would the Nigerian cluster for Cashless between Academia, the IT Industry and Business look like?

Imperatives for Nigeria, the Government and the Nigeria Computer Society

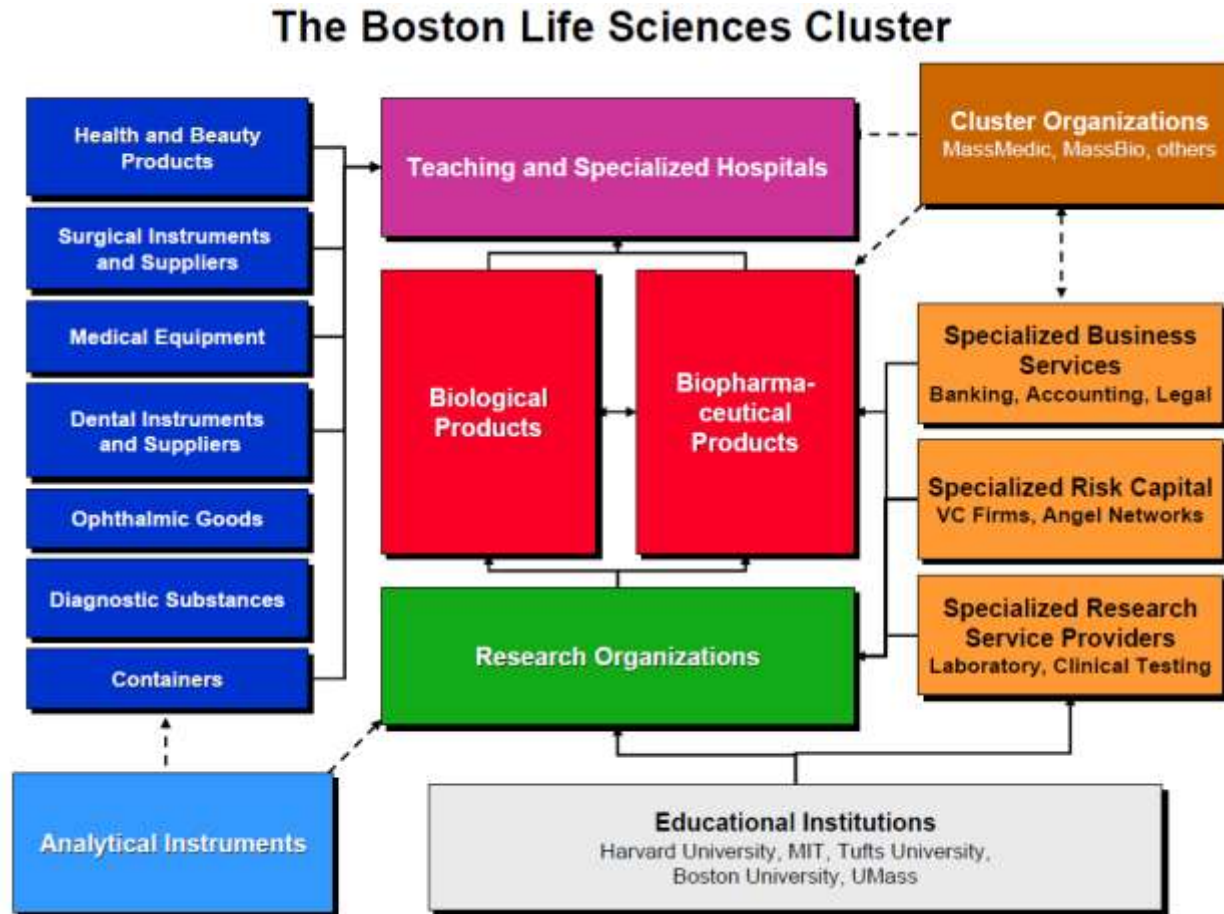

Questions and Answers

Globally, academia, industries and business have successfully built clusters to drive innovation across various industry segments

*Clusters are geographically proximate group of interconnected companies and associated institutions in a particular field, linked by commonalities and complementarities (external economies)*

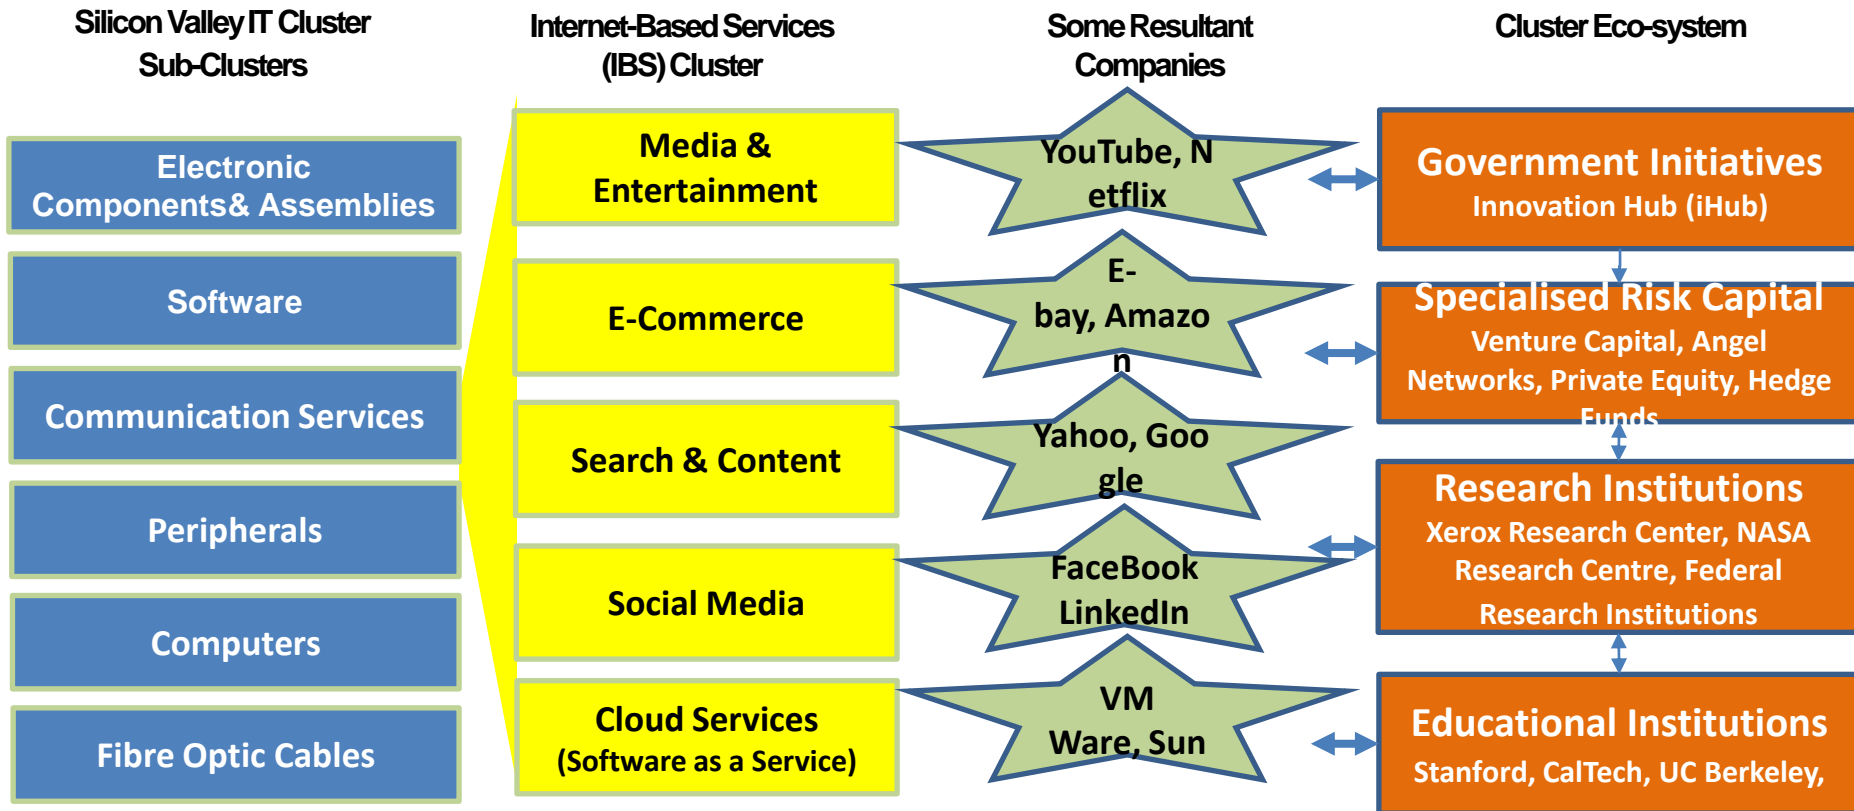

The Boston Life Sciences Cluster is ranked as the No. 1 US Cluster for Life Sciences and is home to major academic institutions and centers of life sciences excellence, all closely located to create a global hub

*It is one of the largest and well established centers for biotechnology and medical device research and development; responsible for 7% of the world's pipeline for new drugs.*

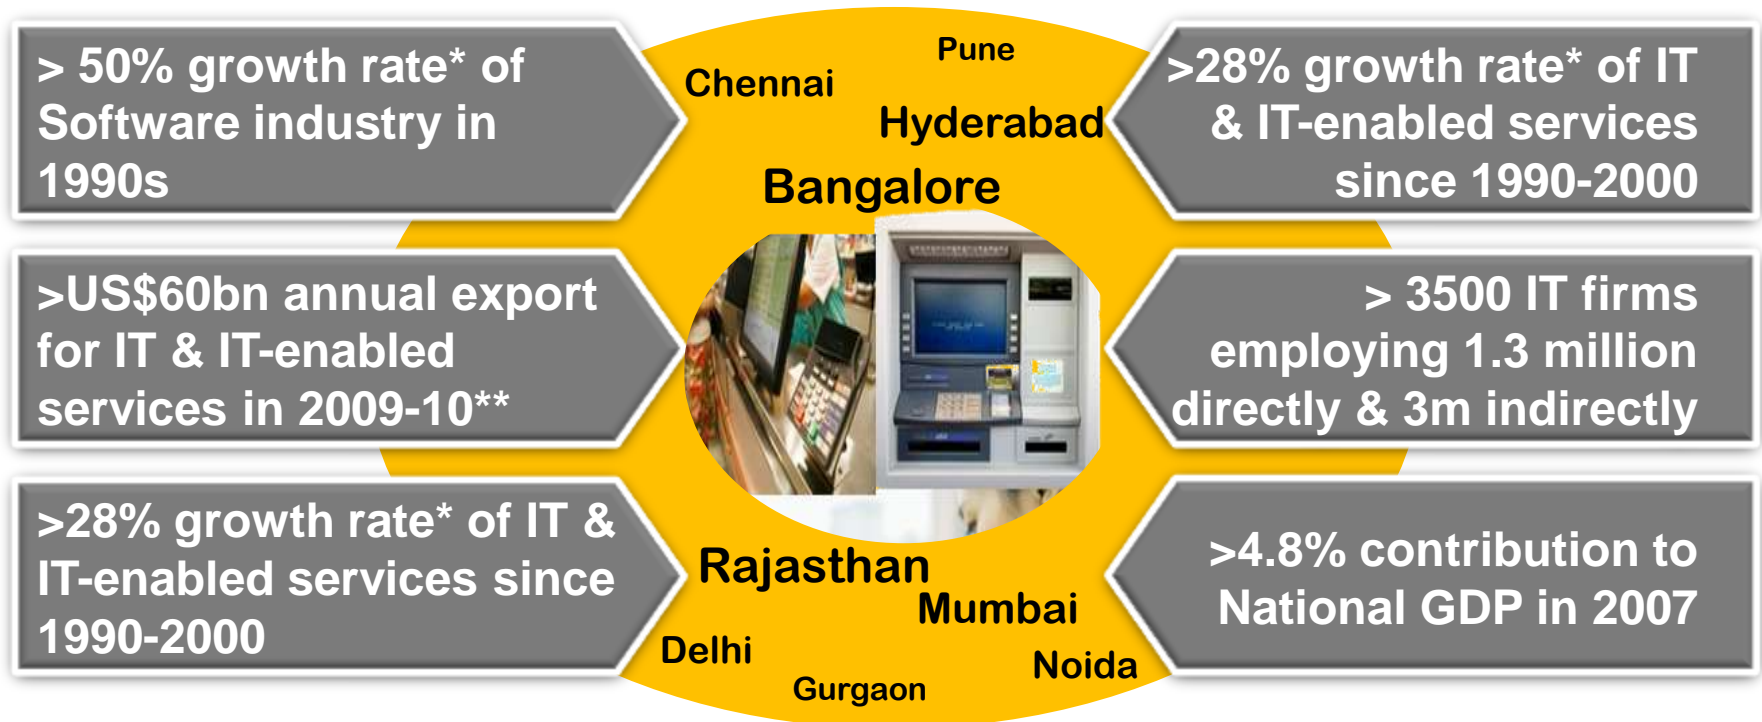

# The founding of Stanford's Industrial Park, the world's first tech-oriented office park, in 1951 triggered the creation of the IT Cluster in Silicon Valley, California

Fueled by a growing venture capital community and solid technical foundations, every decade after the 1960s saw a major technological wave that shaped Silicon Valley, enabling the cluster to build on itself and capitalise on rising technological cycles leading to a shift from hardware to software

There are a total of 138 recognised clusters and 350 SME clusters spread across India

One of the facilitating factors that enabled the rise of the IT industry in India is the evolution of IT Clusters

*Today, most Fortune 500 companies outsource some of their software-related work from India*

# Technology Cluster in the Thar Desert of Rajasthan, Jaipur, India

## Policy

**State Government banned the purchase of computers for personal use**

## No. of Tech Companies

**10 Small technology businesses**

## Use of Technology

**Most state's businesses have little or no automation**

## Environment

**Very limited use of computers**

## Eligible Workforce

**Women not allowed to work after sunset in any industry**

## Impact

**No other clusters in the area**

# Technology Cluster in the Thar Desert of Rajasthan, Jaipur, India

## Policy

Entrepreneurs banded together to educate the state government about technology and help craft more tech-friendly policies

## No. of Tech Companies

Over 100 global technology and related businesses (Infosys, Wipro, Tech Mahindra, Genpact) including banks

## Use of Technology

Most businesses educated on and utilising technology such as rug/ carpet making

## Environment

Many traditional industries are now employing modern IT practices in their operations

## Eligible Workforce

Employees including Women allowed to work 24/7

## Impact

Other industry clusters have sprung up, riding off the back of technology - rural tourism, minerals, leather, etc.

*In 2006, Mahindra World City (\$2 billion investment by Mahindra & Mahindra and the Rajasthan government) opened. Expected to be fully functional by 2014, over 100,000 people will be employed and companies housed there are expected to create over \$3 billion in annual exports*

Clusters increase productivity/ efficiency, stimulate and enable innovation(s) and facilitate commercialisation/ industrialisation and new business opportunities

- ❑ Productivity/ Efficiency - Highly skilled /specialist can be employed to serve members of clusters
  
- ❑ Innovations(s)
  - Deep and rich talent pools and better infrastructure
  
- ❑ Industrialisation/ New Business opportunities
  
- ❑ Sectoral/ regional economic development with unified/ integrated approach to problem solving
  
- ❑ Financially weak members of each clusters are able to survive by sharing expenditure - common facilities like canteen, welfare, first aid etc. shared by members.

*The role of governments in providing enabling environments and supporting policies cannot be understated.*

Introduction

Why Cashless Nigeria? Why Now?

What are the Benefits and Key Success Factors for sustainable Cashless Nigeria?

How can Academia, the IT Industry and Business be the innovation hub for Cashless Nigeria? – *Case Studies and Key Lessons Learnt*

**What would the Nigerian cluster for Cashless between Academia, the IT Industry and Business look like?**

Imperatives for Nigeria, the Government and the Nigeria Computer Society

Questions and Answers

Nigeria is now ranked 123 out of 141 countries overall in the 2012 Global Innovation Index. The country was ranked 96 in 2011 and 70 in 2009

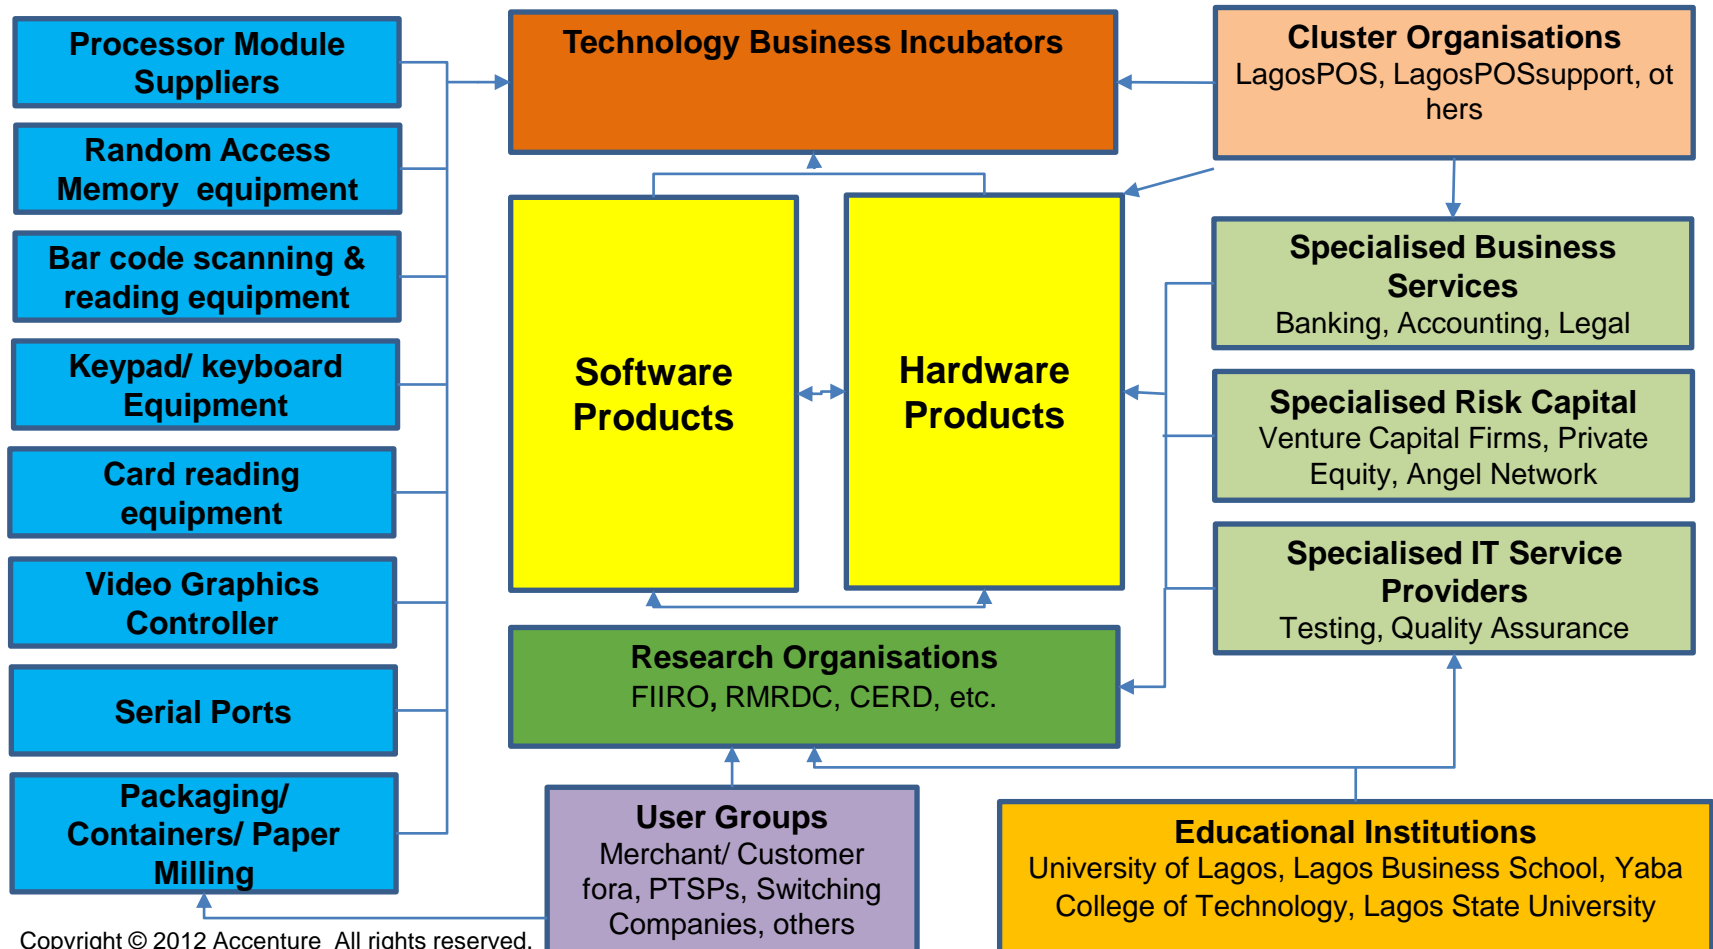

□ The index measures a variety of innovation input and output measures

	<b>Nigeria</b>	<b>India</b>
– <b>Global Innovation Index</b>	<b>123</b>	<b>64</b>
– <b>Innovation Efficiency Index</b>	<b>17</b>	<b>2</b>
– Research and Development	109	55
– Infrastructure	134	78
– Computer & Communications Service Exports	131	4
– Knowledge Absorption	95	81
– Innovation Linkages	123	59
– Knowledge Creation	113	54
– Knowledge Impact	112	67
– Knowledge Diffusion	111	33

*Nigeria requires deliberate policy and interventions to position for innovation in a sustainable manner*

# Nigerian Cluster for Sustainable Cashless Economy

*Possible Cluster Arrangement for Lagos – What role do you see the NCS playing?*

Introduction

Why Cashless Nigeria? Why Now?

What are the Benefits and Key Success Factors for sustainable Cashless Nigeria?

How can Academia, the IT Industry and Business be the innovation hub for Cashless Nigeria? – *Case Studies and Key Lessons Learnt*

What would the Nigerian cluster for Cashless between Academia, the IT Industry and Business look like?

**Imperatives for the Nigerian Government and the Nigeria Computer Society**

Questions and Answers

## Clusters engineered from the top down don't usually work...

- ❑ Government alone cannot make the magic of a thriving cluster happen; but with enabling policies and environment, can contribute to making it happen
- ❑ Cluster development is best driven by entrepreneurs or industry think tanks who provide the lead and lobby the government to provide the required support. e.g. Thar Desert in Rajasthan, India
- ❑ The real opportunity is to develop, strengthen and diversify innovation ecosystems with better skilled human capital, information infrastructure and finance

# Imperatives for the Nigeria Computer Society

- ❑ Push for professionalism and continuous professional development
- ❑ Align agenda, focus on engagement and lobbying of key stakeholders to promote growth of the industry
- ❑ Coordination and collaboration to create viable Clusters with strong linkages in specific niche industries, utilising technology as a platform
  - IT/ Communication
  - Media Technology
  - Film and Entertainment
  - Etc.
- ❑ Creating linkages and appropriate ecosystem to enable Innovation
  - Creation of Innovation Funds and Angel Networks in partnership with the FSI
  - Industry Innovation Clusters with association with industry associations e.g. NACCIMA
  - University Innovation Clusters in conjunction with NUC/Universities
- ❑ Develop appropriate information infrastructure to drive innovation

# Imperatives for the Nigerian Government (State and Federal Level)

- ❑ Government should play different role at different stages
  - Formative Stage: Government as an enabler to provide the right foundation for success
  - Growth Stage: Government as a Participant and key customer to boost adoption
  - Stability Stage: Government as a Facilitator to build new capabilities & extend to other sectors
  
- ❑ Provide enabling environment and supporting policies and infrastructure as policy has a huge impact on strengthening the cluster
  - Economic development programs
  - Appropriate information infrastructure to drive innovation
  - Multiple incubators for early stage companies
  
- ❑ Deliberate funding programs through MDAs or special agencies to facilitate Job growth, economic development, and commercialisation/ industrialisation
  - Research Matching Grant Program: Match funding for academic institutions
  - Internship Challenge Program: Fund interns working in target cluster companies
  - Accelerator Program: Provide capital for early-stage companies in target
  - Small Business Grants: Federal funds to encourage growth of small businesses
  - Small Business Matching Grant Program: State Governments match funds for federal small business grants
  - Tax Incentive Program: Create tax incentives and other offerings for companies to locate and expand in target cluster locations by state governments

# Imperatives for Academia

- ❑ Improve overall quality of education, especially technology and ancillary IT Services
  
- ❑ Provide linkage between academic curriculum and real IT business world
  - Improved relevance of Academia to business world and IT Businesses
  
- ❑ Provide enabling environment for innovation in academic environment
  - Relevant research and curriculum
  - Innovation programmes
  
- ❑ Collaboration with the Business world to provide comprehensive education for technology students
  - Include Business courses in Technology curriculum
  - Internships served in Business roles should be considered as part of overall Internship programmes
